

Aleksi Lehtomäki

Energy Engineer - Simulation, Modelling & Optimisation

aleksi.lehtomaki@darkkis.fi +358404109019 Lappeenranta, Finland

PROFILE

MSc in Energy Technology with expertise in turbomachinery, CFD, thermal analysis, and modelling of complex systems. Proven ability to solve complex multi-domain problems involving fluid flow and heat transfer, process engineering, simulation, R&D and optimisation. Experienced in developing custom tools and workflows to improve analysis efficiency and support engineering decision-making by translating complex physics into engineering insight. Comfortable working in Linux and HPC environments.

EXPERIENCE

Simulation Engineer · Aurelia Turbines Oy

2023 – Present
Lappeenranta

- Performed CFD simulations using Cadence Fidelity
- Planned test rigs, instrumentation and testing and participated in testing
- Analysis of simulation and test data to validate models and performance
- Process simulation with OpenModelica
- Built Python tools to automate workflows and improve analysis efficiency
- Contributed to R&D of gas turbine components and system-level design.

EN-FI Translator · Self-employed

2018 – 2025

- Delivered technical and commercial translations across multiple domains
- Managed B2B client relationships, sales and project delivery independently
- Handled accounting and business operations
- Produced other written content including marketing material and SEO texts.

EDUCATION

Master of Science (Technology)(Bioenergy Systems) · LUT University

2016 – 2024
Lappeenranta

Minors; BSc: Electrical technology, MSc: Broader Major. GPA 3

SKILLS

Thermal engineering Fluid engineering Turbomachinery CFD Engineering problem solving
Python Matlab Process simulation(Modelica) Optimisation Linux HPC Slurm
